

# Rebates up to \$200 for improving your home's heating duct system

New Mexico Gas Company offers a **\$200 rebate** when you have a participating contractor seal your home's duct system.

## How It Works

A participating contractor will:

- Inspect the whole duct system, including attic and crawl spaces
- Perform a “pre” duct leakage test to help target your largest gaps
- Make the recommended air sealing improvements
- Repair damaged and disconnected ducts
- Seal all leaks and connections with mastic, metal tape or an aerosol-based sealant
- Evaluate air flow after repairs are completed
- Ensure there is no backdrafting of gas appliances and conduct a combustion safety test after ducts are sealed
- Complete a “post” duct leakage test to show your improvements

Rebates are available if a “pre and post” duct leakage test shows your improvements cut air leakage by 10%.

A Natural Choice.

# Benefits of sealing your home's duct system

A duct system that is well-designed and properly sealed can make your home more comfortable, more energy efficient, and safer.

## You'll also get:

- **Improved comfort.** Solve common comfort problems, such as rooms that are too hot in summer or too cold in winter.
- **Energy savings.** Increase efficiency, lower your energy bills and pay for the upgrade with savings.
- **Better air quality.** Reduce the risk of pollutants entering ducts from dusty attics or musty crawl spaces and circulating through your home.
- **Improved safety.** Reduce the risk of "backdrafting," where combustion gases (like carbon monoxide) from gas appliances reenter the living space, rather than releasing outdoors.
- **Available rebates. Save up to \$200** when you use a licensed and insured participating contractor to seal your home's duct system.

► **Talk to your contractor to learn more.**

Equipment must be purchased on or after April 1, 2023, and installed by March 31, 2024. Rebate applications must be received by April 30, 2024.
