

# Provide **Instant Rebates** for Installing High Efficiency Commercial and Residential Space and Water Heating Equipment

- Install more energy-efficient systems in homes and businesses — delivering more energy savings across New Mexico
- Gain a competitive advantage within the market by offering consumers **instant rebates**
- Leverage rebates to drive and increase sales and grow your business

## How It Works

- 1** Talk with your distributor about how to become a participating contractor.
- 2** Confirm with your distributor that the equipment you plan to purchase qualifies for the rebate.
- 3** Pass on the instant rebate to your customer, then submit your invoice through our online rebate submission tool.
- 4** Submitted invoices will be approved by your distributor and you will be reimbursed for the instant rebate.
