# Benefits of choosing an ENERGY STAR® gas furnace or boiler

- **Energy and money savings.** A high efficiency gas furnace or boiler is at least 12% more efficient than standard models, so you'll save on energy costs year after year.
- **Enhanced comfort.** Models with AFUE ratings of 95% or greater can help you save energy and money while improving the comfort of your home.
- **Improved safety.** High efficiency gas furnaces and boilers are designed to reduce the risk of backdrafting dangerous carbon monoxide exhaust into your home.
- **Increased durability.** Designed with advanced technologies and high-quality components, these systems often last longer and have longer warranties than standard models.
- **Instant rebates available. Get up to a \$425 rebate** on your purchase when you use a participating contractor.

► **Talk to your contractor to learn more.**

\*Equipment must be purchased on or after April 1, 2023, and installed by March 31, 2024. Rebate applications must be received by April 30, 2024.
